The user has the "Everyone" role. The user has the "Full Control" permissions on the folder, and I would like to remove the "Read permission" from the "Security" tab of the folder properties. In other words, I need to remove this user's rights to read data in this folder. The user can't get admin rights, so the command lines don't work. Any idea of how can I achieve that? The user needs to be able to read data from this folder. A: Did the user
